

Archer 1200

An unanchored, “drop-and-stop” barrier for deployment on roadways and hard surfaces.

Meridian’s ultimate rapidly deployable barrier, the Archer 1200™ can augment fixed in place barriers or be utilized as a primary security system for entry points, roadways and perimeters.

Manufactured of high strength, ballistic rated steel, the Archer 1200 is easily installed by one person without the use of cranes and heavy equipment. Simply off-load and place the barriers for almost instant protection—no anchors or assembly is required.

The Archer 1200™ barrier is an ideal application for:

- ports and transportation centers
- energy and chemical plants
- military bases
- college and university campuses
- financial centers
- stadiums and arenas
- police and fire departments

Archer Barriers provide a new option for security and protect an organization’s investment in its people, facilities and assets.

Archer 1200™ patent pending

The Archer Barrier Systems include the following features:

- Unanchored, rapid deployment on roadways and hard surfaces
- One person portable
- Fabricated of high strength steel
- Ballistic rated for armor piercing NATO rounds up to .50 cal. ball rounds
- Non-electronic, non-hydraulic design reduces training and maintenance costs
- Modular design enables flexible configuration

Measurements

2' wide, 4' deep, 30" high (per barrier)
